Our expertise and  
technical proficiency

has been honed through decades of  
dedication in serving our residential  
and commercial clientele in Thailand,  
Singapore and around the world.

A WELCOME ADDITION  
INTO EACH HOME

Our shutters give each living space a welcoming and warm ambience, whilst adding life and vibrancy to the look and feel of each home we enhance.

BECAUSE...  
EVERY SPACE SHOULD BE ALIVE

One can move the light by tilting the shutters, instantly bringing in warmth and liveliness, and yet maintaining the screened privacy of each space.

## BECAUSE... SIMPLE IS GOOD

Sunleaf Shutters emphasis on ease of use and function make our shutters an ideal fit into any home. Our shutter's simple-to-use louver handle works with great precision. Along with the simplicity of cleaning and maintaining, it makes shutters a joy to use and live with.

## BECAUSE... EACH HOME MIRRORS ITS OWNER

Sunleaf Shutters cater to a wide selection of personalised options; in terms of shape, size, colour, mechanism and type of natural wood. Each bespoke set of shutters is crafted to reflect the personality and character of the owners living in that space.

BECAUSE...  
THERE IS NO COMPROMISE  
ON QUALITY

From the choice of beautiful hardwood components, to the hand crafting of each panel and the precision layering of multiple coats of high grade paint or stain finish; the fabrication process gives rise to a beautiful, strong and durable product.

## BECAUSE... IT'S GOOD TO BE GREEN

Sunleaf Shutters help keep interiors cool by reflecting and restricting heat from filtering in, thus saving energy in each space. With ease of care, each set will last for decades and age beautifully, saving the need to periodically change window coverings over the years, unlike curtains or blinds. In addition, the American ash wood used to fabricate Sunleaf Shutters is sourced from sustainable or 'farmed' forests, thus helping save the Earth's natural forests.
